Nothing of greatness can ever be achieved by any country without giving importance to their youth. Youth is an amazing thing because it is not only the hope of our future but the actual strength of our nation as well.

Our youth can create a difference only when they are empowered. An empowered youth is the one who learns to work on developing their skills to start earning at an early age.

In this article, I will be discussing the **importance and benefits of youth empowerment to society**.

The rest of your life can be the best of your life if you are living in a nation where being a youth, you are empowered.

It not only results in a better economy of our country which is fluctuating most of the time but also creates a habit and sense of responsibility in our youth to do more.

It is said;

“Empower the youth, Transform the lives of society, Make  
the difference.”

## IMPORTANCE OF YOUTH EMPOWERMENT:

The importance of youth empowerment can never be denied because youth is the base of any nation. A country can never achieve the heights of success if its youth is lacking behind.

So many youth empowerment programs are launching overtime because finally, people came to know, when youth is empowered, it gives rise to a strengthened nation.

A society will be secured enough when your youth is empowered because an empowered youth will never give any harm to the society in which they are living.

Youth empowerment creates a sense of responsibility and leadership skills in our youth due to which they can feel and identify the actual practical problems of the society from which many people are suffering.

They no more wait for the high authorities to come and sort out the problem instead they take some practical steps to solve the problem on their own.

AN empowered youth is always passionate and dedicated towards their work and their society and they always dare to do something big for the betterment of society.

I would love to share the quote that inspired me and would inspire my young generation;

“If our youth arise and act, they have the strength and dynamism to generate a huge transformation in the society.”

The impacts of youth empowerment on our society are amazing and left a greater impact even on the women of our society.

These days, everyone is talking about women empowerment because an educated and well-mannered youth has given rise to a society where the participation of women is considered equally beneficial and important as that of men.

Women empowerment matters a lot as t is said;

“An empowered woman is powerful beyond measure and are the real architects of the society.”

I have so much to talk about women empowerment, and I will share my views and knowledgeable content regarding women empowerment in my upcoming articles.

For now, we will be having a comprehensive discussion of the **importance of youth empowerment to society**. Let's have a detailed look at each importance.

## POVERTY ERADICATION FROM THE SOCIETY:

This is one of the first and the foremost reason that youth empowerment is the need of today's society. A country can never prosper if the poor become poorer and the rich become richer.

You might be thinking about how youth can change society and eradicate poverty from society but this question can only be answered by the beautiful quote stated below:

change always begins from within--if you want to change something, strive hard to change yourself first and you will end up having positive changes and better results

**Youth empowerment** plays a vital and significant role in poverty alleviation and eradication from society. As I have mentioned earlier, **an empowered youth focuses more on the development of their skills to make it a better source of earning for them in the early stages.**

When the youth of society equip themselves with the essential skills that can pay them well enough in the long run, so they decrease the poverty rate in the listed below forms:

1. They feed themselves from the money they earn from their skills.
2. They facilitate others in skill-building and help them to become financially independent as well.
3. They invest the money somewhere in businesses which is not only profitable for them but for the economy of our country too.
4. They try to bring [innovation into business](#) to earn more and make it even more profitable.

Empowered youth can only eliminate poverty from society if they focus more on the skills in their respective domains and uplift many others to become financially independent as well.

So the necessary prerequisite to becoming financially independent is to learn essential skills which can give you a high return on investment and thus results in eliminating poverty from the society in which you are living.

Here investment doesn't mean money or other such resources, by the term investment o mean the investment of your skill, your passion, your hard work, and dedication towards your work.

By investing in these things, you can eliminate poverty from your society and you will be no more dependent on others.

## **CRIME REDUCTION FROM THE SOCIETY:**

When the youth of the country is not supported morally, they often adopt the wrong ways which can not only harm them but also creates negative circumstances for the country too.

This is why youth empowerment should be promoted efficiently so that not even a single person indulges him/herself in the wrong activities that often lead to crimes.

When un-empowered youth step towards the path of crimes, they are not only harming themselves but prove to be a threat to the society in which they are living.

A youth commit crimes only when no one supports them morally, their financial needs are not fulfilled, their hard work doesn't pay them off, so when a young person suffers from such kind of situations, they can easily direct themselves to the path of crimes which must be a threatening situation for any nation.

It is said;

we should be tough on crime but we should be even more concerned and tough on the causes of crime

An empowered youth is smart enough to feel the difference between what is wrong and what is right for them.

They will always do justice with themselves first because an educated and wise person will strive hard to fulfill their needs but there is no chance for them to adopt the wrong path which in turn harms them and their society badly.

## IMPROVED STANDARDS OF EDUCATION FOR THE SOCIETY:

Education is extremely valuable for those who have to strive hard to empower themselves. The standards of education can only be improved when we give value to education and society can only be uplifted when we give rise to youth empowerment.

When the students are trained and encouraged in a way that they should be responsible enough to create leadership skills in them and should be trained to work on their skills development to earn at an early stage.

It is said;

“The main hope of the nation lies in the proper education of  
its youth.”

## EMPLOYMENT CREATION:

Last but not the least, this is one of the most important points for youth empowerment because you might have seen every second person saying that "**I am jobless**".

They are jobless not because they lack skills in their respective domains but because they do not grab the opportunities and do not make a try for themselves.

Never depend on the economy of your country because it is fluctuating, there is so much unemployment in underdeveloped countries so you must be capable enough to work hard and become financially independent by empowering yourself.

It is said;

“Youth become great, not because of their power, but  
because of their ability to empower others.”

An empowered youth never complains about unemployment and opportunities, they work by themselves and creates opportunities for themselves.

Try to be your boss and grab the opportunities to empower yourself as well as create employment opportunities for many others not only for making them financially independent but also for the betterment of society.

## BENEFITS OF YOUTH EMPOWERMENT TO SOCIETY:

The importance of youth empowerment is now considered by every second nation and the ratio in which youth empowerment is increasing is amazing and appealing.

When a single person shows a desire for skill development and earning to become self-employed, it inspires so many others as well and thus they uplift the society together.

A very famous saying written by **Franklin**:

“We can not always build the future for our youth but we  
can build our youth for the future.”

There are countless contributions and benefits of youth empowerment to society. Empowered youth can fulfill their needs as well as their dreams.

Only self-employed youth is motivated enough to work hard and grab as many as opportunities they can.

The youth of today's world is motivated enough to take initiatives for the betterment of society because it's the young people who provide strong support to society and gives rise to an empowered society.

One of the biggest impacts that youth empowerment can ever have on our youth is that they no more wait for the opportunities to come and earn, instead, they identify the problem, creates an opportunity, and empower themselves along with many others.

Now let's have a detailed look at each of the benefits that youth empowerment has given to our society:

### **YOUTH BECOME FINANCIALLY INDEPENDENT:**

One of the biggest advantages and benefits of youth empowerment is that or youth become [self-employed](#) and are no more dependent on anyone for their needs and wants.

An empowered and dedicated youth works hard and creates employment opportunities for them to gain financial freedom and hence results in contributing to the economy of the country.

It is better to be self-employed and turn your skill and passion into a proper source of earning for you rather than doing a 9-5 job to utilize your skill to establish someone else's business. So the only method is to become self-employed and be the boss of your own.

It is said;

“Being self-employed isn't a career choice. It's a life style  
choice.”

### **THEY LEARN MORE TO EARN MORE:**

Learning is a continuous process that you can never stop at any stage of your life. The [importance of learning](#) can never be denied especially in the case of youth empowerment.

Because empowered youth always needs to upgrade themselves in their respective domains to beat their competitors.

It is said;

**“What you earn depends upon what you learn.”**

The more our youth learn, the more effectively they can implement and hence the more handsome amount they can earn. So, with such motivation, they never limit themselves and never stop themselves to learn.

### **THEY ARE ALWAYS IN SEARCH OF OPPORTUNITIES:**

This is one of the biggest benefits of youth empowerment on our youth that they do not make a complaint about the lack of opportunities or wait for the opportunities to come.

Instead, they search for opportunities and grab them to provide benefits to their society and the economy of a country.

It is said;

**“Waiting for opportunity is stupidity while creating  
opportunity is intelligence.”**

They keep on improving themselves and make them able to grab the right opportunities for themselves which can help them to gain newer heights of success.

### **CREATE A SENSE OF RESPONSIBILITY:**

One of the great benefits of youth empowerment on the youth of our society is that they create a sense of responsibility in them. A responsible youth in any society gives rise to an empowered and ideal society.

It is said;

**“The moment you take responsibility for everything in your  
life is the moment you can change anything in your life.”**

When the youth of society is responsible enough, they do not utilize their time and efforts in bad activities instead they value their time and keep them to stay focused and concentrated on their goals.

### **HELP OTHERS TO EMPOWER:**

An empowered person is always open to help others. They are not of the view to create professional jealousy, instead, they teach others, share their experiences and help others to uplift the society in which they are living.

Being a good human being, you will never want other people to face and suffer from those hardships from which you have suffered.

So, the major and ethical advantage of youth empowerment on our youth and society is they help others to empower and teach them to be an inspiration for many others.

## VALUE THEIR OWN TIME:

Almost everyone has heard of this phrase, **Time is Money...**

So one of the amazing benefits of youth empowerment on the youth of our society is that they have learned to value their own time because if they do not value your time, neither will others care about your time and will never value your work.

It is said;

**“Time is money, wasted time means wasted money.”**

Being an empowered and self-employed person, time is one of the most mandatory things that you have to take care of.

Because when you are self-employed, there is no exact figure to earn, it's all a matter of time. The more you dedicate your time and hard work to your work, the more you earn.

## GIVES RISE TO CREATIVE MINDS:

Last but not the least, a creative mindset can beat anything. If you have a creative mindset, you can create many opportunities for you to make it an effective source of earning for yourself.

An empowered society gives rise to the creative mindsets that take initiatives for the betterment of society and hence creates smart ways of earning for themselves.

It is said;

**“Youth must do hard work to make money and then they  
must do smart work to use that money to make more  
money.”**

If you are self-employed, you must be able to create more and more legitimate and creative ways of earning for yourself and double the income that you have now.

## FINAL THOUGHT:

If you are a young person in this society and came across this article, then it is your responsibility to focus on your goals and do not rely on someone for your needs.

You must empower yourself to gain financial freedom and to uplift your society as it is your social responsibility and also to promote youth empowerment in society.

Being the backbone of your country, it is your foremost duty to become socially responsible and empower yourself to become financially independent.

I will be sharing more knowledgeable content regarding the ways by which the youth of our society can empower themselves efficiently.

Use the comment section to share your feedback and queries regarding the "**Importance and benefits of youth empowerment to society**", I will respond to you as soon as possible.

Do share this content with young people to give benefits to your society because the success of the nation always lies in the success of the youth.
